

HYDRAULIC POWERPACK DHP18E

MOBILE WITH ELECTRIC MOTOR

A very powerful hydraulic powerpack made for high power. Provides maximum output to the connected tools

Mobile, Compact & Adjustable

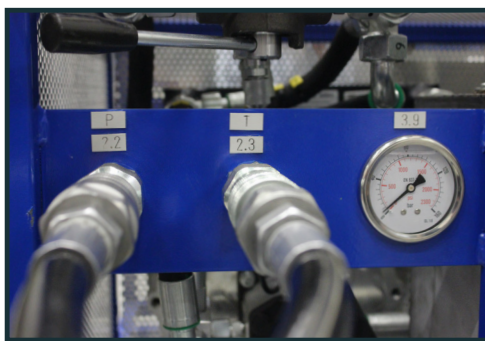

This hydraulic powerpack has a stepless adjustable flow rate of 10 to 50 l.p.m. at full power at max. 105 bar. Therefore it is possible to connect standard 10 l.p.m. tools as well as 50 l.p.m. high performance tools. The flow rate can be adjusted directly on the powerpack or on the remote control.

Powerful & Flexible

Due to the 11 kW engine this is a powerpack for professional use. As it will drive powerful tools such as breakers, wall saws, large cut-off saws, hydraulic chain saws, pipe cold cutting machines, pipe beveling machines and also small 10 l.p.m. tools, the DHP18E provides maximum flexibility.

Professional Technical Features

High quality hydraulic components of European Manufacturers

Temperature, Pressure and Filter indication

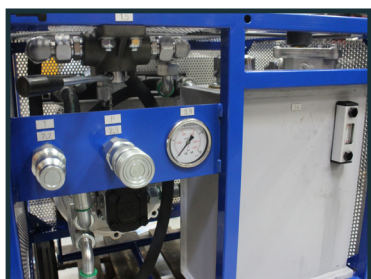

Electronic Phase Converter by Parker

Remote control for start, stop, stepless speed control for sensitive operations

Hydraulic Powerpack Type DHP18E

Applications

- Pipe beveling machines
- Pipe cold cutting machines
- Breakers
- Water pumps
- Chain saws
- Drilling equipment
- Core drills
- Torque wrenches

Technical Data

- 11 kW / 400 V, 50 Hz electric motor
- Output 10-50 l.p.m. / max. 105 bar
- Weight 145 kg (empty)
- Dimension: 1080 x 650 x 780 mm
- Remote control with 20 m cable
- Oil tank: 10 ltr
- Stepless flow rate adjustment for speed
- Filter wearing indication
- Pressure indicator
- Temperature indicator

Advantages

- Remote control (speed, start, stop)
- Easy to move due to compact design
- Extremely easy to service - direct access to all parts
- Visual control of all parameters (pressure, temperature, filter wearing)
- Built strong with few wearing parts
- Strong steel frame
- Made in Germany
- Electronic Phase adapter by PARKER
