

***RSW* INTERNATIONAL**

GLOBAL TECHNICAL SERVICE

NOTHING IS IMPOSSIBLE

WHO WE ARE?

With more than 15 years of experience as a Technical Service / Commissioning Engineer in different Industrial Fields, I founded the company back in 2009.

My main goal was to meet the high demand for experienced technicians, who had the capacity to work with different brands and types of machines in different fields.

Over the last 12 years we build the company to what it is today.

RSW International has a skilled team of service and commissioning engineers who can take care of your equipment installation, maintenance, and relocations mainly in Europe and the Americas. We distinguish ourselves by a unique service-oriented attitude towards clients and end-users. We are specialized in Troubleshooting, Servicing and Commissioning large and Small Production equipment.

Together with our Global partners we can fulfil the demands of our customers in our fields of activity such as,

- Shipyards
- Pipe spool manufacturers
- Metal construction Fabricators
- CNC Equipment manufacturers
- And lots of other industry related Fields

In 2020 we have added a new pillar to our company, complementing the provision of Technical Service. We now offer, to our field related, Products and Production equipment through a Web shop but when you contact us directly, we can offer custom made solutions which serve the needs of your company.

In combination with several Partners from all over the world we offer,

- Digital Read Outs and accessories for Lathes, milling and other machines. Wide range of choice, for Hobby or Industrial use.
- Measuring Tools and Measuring Equipment. Well respected Brands.
- Tools and accessories for Pipe welding and Fabrication facilities.
- Cold Pipe Cutting and Beveling Equipment
- European manufactured Laser Cutting and engraving Equipment. Used in different Types of Industries and in Technical Education.
- Electronic Welding Gas Regulators for Automated and manual MIG/MAG Welding processes.

In the following pages I will introduce our partners to you.

Happy to be of Service in the future and thank you for reading our story,

Ricardo Sandor Wagemaker, Managing Director

WITH WHO WE ARE?

Since January 2020 we are representing TRABISS International, a company from The Netherlands who builds laser engraving, marking and cutting Equipment which can be widely used in machine construction, equipment / instrument construction, and industrial production.

Our partnership with TRABISS International is based on a like-minded approach to customers and this is reflected in good service and after-sales. We represent them in Southern Europe as **Service** and **Distribution Center** for their Laser Equipment and accessories. And because of the representation of Trabiss International we can offer the wide range of digital readouts for lathes and milling machines, digital and analogue precision measuring equipment, digital calipers, and much more in our Web shop. This goes beyond delivering of our own products. Are you the owner of a Newall, Sony, Mitutoyo, Heidenhain, Fagor or other brand digital readout and you have a problem or want to buy replacement parts? Please contact us. We can in many cases, help you to deliver the parts for the mentioned brands. Repairs are in some cases better than replacing. Ask us for advice.

Service is an important pillar in both our companies. The core values that we stand for are:

- Quick response to mail and questions.
- Professional assistance and advise.
- Listening to the feedback from our customers.
- Think in solutions.

In May 2020 we started the representation **HSP-Worldwide**, a company based in Dordrecht, The Netherlands. HSP-Worldwide is a specialist in on demand supplying of instrumentation, tubing, hoses, and valves for a wide range of hydraulic purposes.

Secondment they have a network of qualified Service and Commissioning engineers who they can send out for your worldwide hydraulic projects. On- and Offshore.

Together with **HSP Worldwide** we can offer you the complete package: Inspection, Engineers and all the necessary parts.

Our scope off supply to customers:

- Inspection of complete On and Offshore units.
- Commissioning of Cargo valve systems, hydraulic units, etc.
- Repair and overhaul of complete hydraulic units on site.
- Overhaul of hydraulic valve actuators.
- Overhaul of complete tubing installations.
- System upgrades.
- Supply of all the necessary materials for all systems.
- And finally, **EVERYTHING** against **COMPETITIVE** rates.

For more information regarding available Products and / or Service see our website, www.rswinternational.pt or send us an email contact@rswinternational.pt

We are the official Distributor for **DWT** Pipe Tools in Portugal and the Netherlands.

The equipment is designed and manufactured in Germany and is used worldwide in various kinds of Industries, amongst others:

- Pipe workshops on- or off site - [Cold cutting and beveling equipment.](#)
- Heat exchanger manufacturers - [In-and outside Bevel equipment.](#)
- And in the On- and Offshore industry on onsite Jobs - [In-and outside Bevel equipment.](#)

The Equipment is invented by a renowned German steam boiler manufacturer „Deutsche Babcock“, who has developed the machines for their own need, with the experience of their own people on-site.

DWT Pipe Tools took over the production on a later stage. The advantages were obvious due to exceptionally low weight, high degree of flexibility and capacity. The machines are designed for a long lifetime with low spare part need and ergonomic use on-site.

We as **RSW International** are a Service Center and Distributor in Portugal and can give you advice on what type of machine suits your companies needs the best.

If you would like more information sent our sales department an email and we will help you out the best we possibly can, contact@rswinternational.pt or make an appointment for a demonstration of our **MF3iw** cold beveling machine.

Or check our website for more details of what kind of equipment we have to offer www.rswinternational.pt

WE ALSO HAVE EQUIPMENT FOR RENT FOR VARIOUS APPLICATIONS

We are sure that will find what you are looking for.

ECO-GÁS is a company we partnered up with since 2010. At the time, the brand was still administered by the patent holding company **POWERMIG** Welding Automation Solutions a Robotic Welding Systems Manufacturer in Caxias do Sul, Brazil.

They received a lot of requests from their customers, for a solution to **Control** and **Manage** the Protection Gas Flow during the welding process Electronically. So, they started to develop a solution back in 2014 which resulted in the first version being released in 2015 and never stopped evolving the device. The device got attention from all over the world. And is used in more than 150 companies globally.

In 2021 the latest version **ECO-GÁS 4.0** got released **Worldwide** and it is also called the Industry 4.0 Smart device, this is because it does a lot more than its predecessors did in the past. It evolved so far that it enables Clients to manage and control, to export productivity reports and gas usages reports per device, or group of devices through a software application via Wireless network connections remotely. Beneficial for Cost management.

Ever since the development of the first version **RSW International** is responsible for the Sales and Service in Europe. From our head office in Portugal, we organize the importation and distribution throughout all of Europe of this Electronic Welding gas Regulator **ECO-GÁS 4.0**. Download [here](#) the complete Brochure available in English, Português, and Nederlands or visit our website www.rswinternational.pt

For a demonstration or more information, contact@rswinternational.pt

POWERMIG
Panasonic

WHERE WE ARE ACTIVE?

Where our Expertise and Equipment is applied:

Electric Power Plants

Chemical Plants

Refineries

Shipyards

Heat-Exchanger / Boiler
Fabricators

Oil & Gas Industrie

Technical Education
Institutes

Structural Fabrication

Besides the above featured Industrial Areas, we also have a lot to offer for Small – and Midsized Companies and Workshops e.g.:

- Laser Cutting / Engraving for Advertising or Merchandising purposes.
- Measuring tools and equipment for small works shops.
- Tools and Equipment for Pipe spool fabrication shops.
- Tools and Equipment for Stainless steel
- And all others not mentioned.

WHERE ARE WE LOCATED?

RSW International has its Head office in Portugal, located in Aveiro District which is a 45-minute drive from the Second largest City of Portugal, Porto. But we are having Partners all over Europe for whom we do Import and Export for several of the offered products in our portfolio.

A big Industrial region where many large companies active throughout Europe have either a Head Office or a branch office.

The company is Registered at,

Conservatória de Registo Comercial Lisboa com o N.º 514912367 under Wagemaker & Oliveira LDA, Our parent Company.
