MANUAL FLANGE FACER

Type MFF

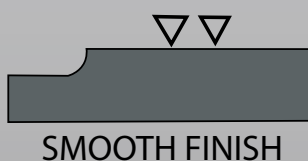

The DWT Manual Flange Facer is a lightweight, easy to use, safe and compact tool that can be used to quickly resurface a flange face. It is easy to use and only requires one person to operate.

The DWT Manual Facer is designed to be used for light machining of small flanges manually. The Machine can be used for „rough thread“ and „fine thread“ facing results.

Facing result depends on tools and feed screw. As a standard machine has „rough thread“ feed screw, with you can make:

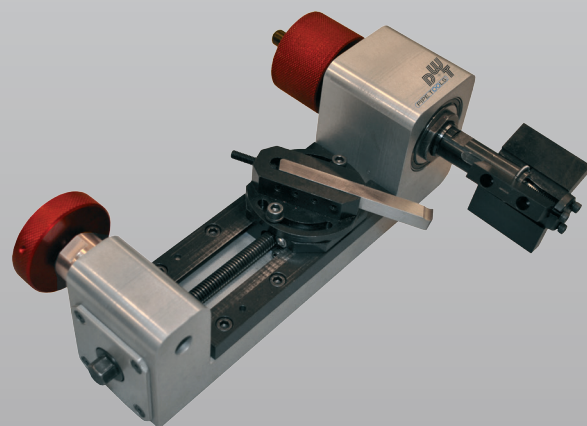

By changing the feed screw to „fine thread“ you can make smooth finishing:

Benefits & Features:

- **Lightweight and portable (4,9 kg)**
- **Adjustable cutting head for reface of flat flange surfaces of pipes with flange OD facing range 25,5 - 420 mm [1 - 16,5 inch]**
- **Interchangeable collets for ID mounting range 24,5 - 162 mm [1- 6,4 inch] allow the user to work on many different flanges with minimal time between set-ups**

*Supplied with carrying case, interchangeable collets, and two feed screws (tools not incl.)

Technical details:

Clamping Range:	Min ID 24,5 mm (1 inch) Max ID 162 mm (6,4 inch)
Workable area:	Min D 25,5 mm (1 inch) Max D 420 mm (16,5 inch) Travel approx. 80 mm
Weight:	4,9 kg

Tooling: (to be ordered on request)

- **Sharp Left hand tool**
- **Sharp Neutral tool**
- **Sharp Right hand tool**
- **Insert - (sold in boxes of 10pcs)**
- **R1.6 tool**
- **Kit of all tooling as above**
